

Before-and-after images from EarthCam show US landmarks as they get inundated with wildfire smoke

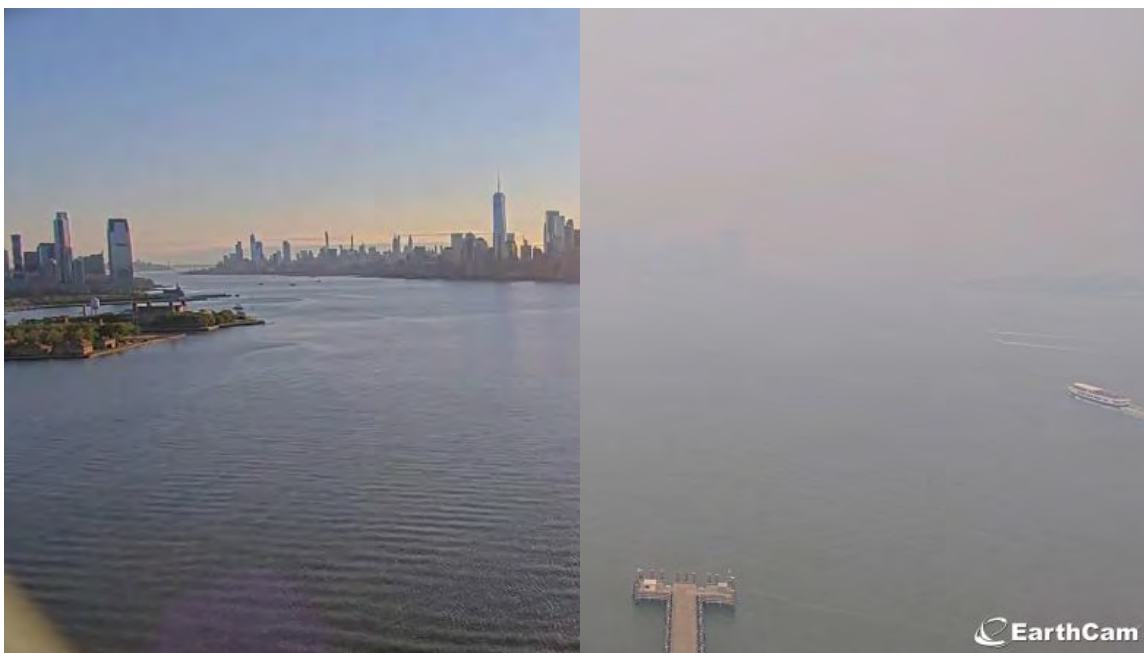

By David J. Lopez and [Emily Smith](#), June 08, 2023

The [wildfire smoke that originated from Canada](#) shrouded some major US cities on the Eastern Seaboard, leaving millions at risk of [breathing unhealthy air](#) and prompting the cancellation of outdoor activities ranging from school recess to [Major League Baseball games](#).

Beyond being a health threat, the smoky skies [altered the view](#) of some iconic landmarks, particularly in hard-hit New York City.

Here's a sampling of those views:

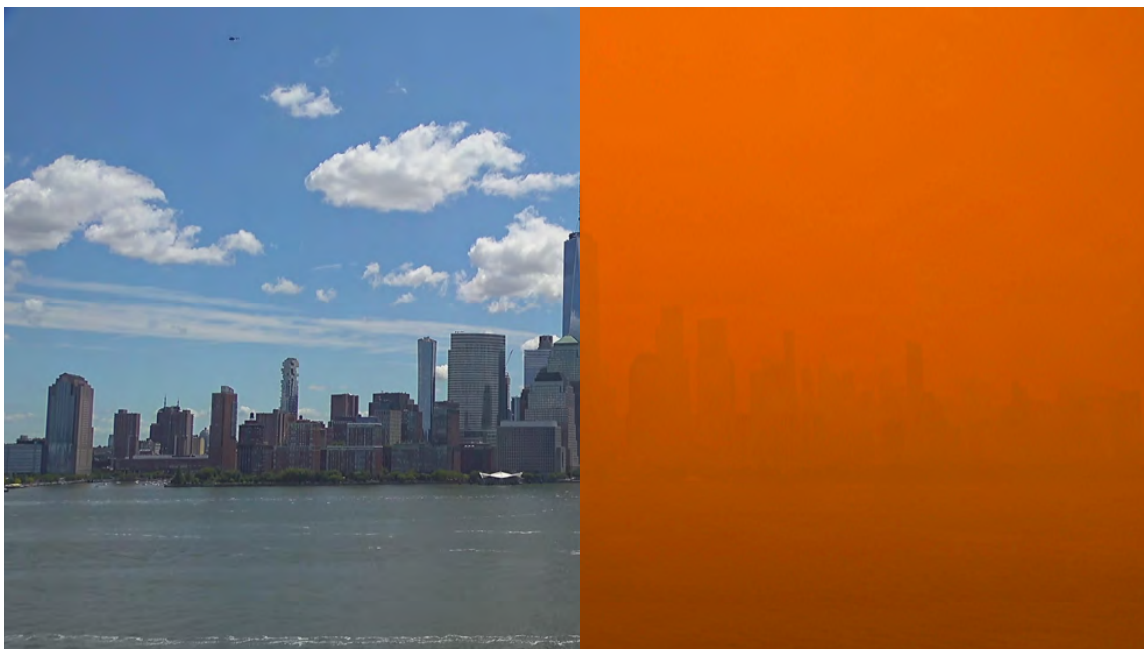

The view up the Hudson River, as seen from Liberty Island
